

Oluchi Judith Ekeleme

Zero-to-One Product Lead · Technical PM · AI/ML · Fintech · Consumer Apps

judithluchi@gmail.com · +234 907 781 5953 · [linkedin.com/in/ekeleme-judith](https://www.linkedin.com/in/ekeleme-judith) · github.com/luch91

PROFESSIONAL SUMMARY

I have taken three products from zero to live, each time owning the full surface: consumer app, admin dashboard, backend architecture, and GTM. Currently Lead PM at Powerhouse9ja, a structured-draw home ownership platform, building iOS, Android, admin dashboard, and draw engine logic from scratch. Technical depth spans MLOps pipelines, LLMops orchestration, multi-agent RAG systems, and AI-accelerated product design.

CORE COMPETENCIES

Zero-to-One Product Development · AI-Accelerated Product Design · AI Agent Design & Deployment · MLOps / LLMops Pipelines · Cross-Platform Consumer Apps (iOS & Android) · Admin Dashboard Architecture · Product Strategy & Execution · Go-to-Market Planning · Cross-Functional Leadership · Systems Thinking & Workflow Design · Automation & ROI Optimisation

PROFESSIONAL EXPERIENCE

Lead Product Manager (Contract) · Confidential May 2026

Leading end-to-end product delivery of a three-platform Nigerian loan management system: borrower mobile app, collector mobile & web app, and admin dashboard, from zero to launch.

- Authored full PRD suite across three platforms (35+ features per app) covering CBN/FCCPC compliance, NIBSS payment rails, and multi-lender portfolio management.
- Designed all UI/UX in Figma with Claude MCP integration, significantly cutting design-to-handoff cycle time.
- Mapped the technology stack across three phases, including KYC, NIBSS NIP/eMandates, and CRC bureau integration — enabling engineering to begin procurement on Day 1.
- Scoped compliance layer covering NDPR 2023, FCCPC ethical collections guidelines, CBN portfolio ageing reporting, and AML/KYC audit trails.

Lead Product Manager · Powerhouse9ja 2025 – Present

Prize-draw platform enabling Nigerians to win high-value homes through structured, transparent draw cycles; an alternative to mortgage debt and instalment loans. · powerhouse9ja.com

- Led zero-to-one product development across 4 surfaces simultaneously, marketing landing page (live), iOS app, Android app, and operator admin dashboard, all built from scratch with an international, cross-functional team.
- Architected core draw engine product logic: tiered prize unlock system across 3 stages (50% → 75% → 100% grand prize), draw cycle management, participant eligibility rules, and prize fulfilment tracking.
- Defined backend data architecture and API contracts in collaboration with engineering, ensuring the admin dashboard gave operators real-time draw visibility, user management controls, and fraud detection tooling.
- Built a high-fidelity, end-to-end interactive prototype for the operator admin dashboard using AI-assisted design tooling, eliminating a full design handoff cycle and delivering screen-accurate specs directly to engineering.
- Delivered a live, conversion-optimised landing page with signup flow ahead of mobile app launch.

Technical Product Manager · Purplegate Technologies May 2022 – June 2024

B2B software development startup — led zero-to-one product builds across two consumer-facing platforms, each shipped with full admin dashboard and operator tooling.

- Built two products from zero to live (food delivery platform and classified ads platform), each comprising consumer app, admin dashboard, and backend API; coordinating design, engineering, and QA across a remote team.
- Redesigned GTM strategy for both platforms, growing product adoption by 22% through repositioned value propositions and targeted user acquisition campaigns.
- Lifted conversion rates by 12% across key product categories by identifying drop-off points via funnel analysis and shipping targeted UI/UX changes.
- Maintained a 95% sprint delivery rate by owning cross-functional coordination and tightening engineering–design–QA handoffs across fully remote workflows.

Technical PM & Product Lead · Seamsville Ltd. August 2019 – May 2022

E-commerce and logistics platform — led product from pre-launch to growth stage, owning consumer app, seller dashboard, and logistics operator interface.

- Built the e-commerce and logistics platform from zero, defining product architecture, user flows, and admin tooling across consumer, seller, and operator surfaces.
- Drove 20% increase in user engagement by running 40+ A/B tests on feature prioritisation and onboarding flows over 12 months.
- Improved successful onboarding completion by 50% by redesigning the first-run experience based on drop-off data and user interviews.
- Improved feature delivery speed by 25% by restructuring sprint ceremonies and tightening engineering–design handoffs.
- Drove 15% improvement in customer retention through multi-channel acquisition campaigns and loyalty-focused product features.

PERSONAL PROJECTS

CognArc · Agentic Cognitive AI Evaluation Platform 2026

<https://cognarc-landing.vercel.app>

An always-on cognitive evaluation platform powered by TRIBE v2 (Meta AI Research / HuggingFace), translating fMRI cortical surface predictions into four real-time product signals: cognitive load, comprehension confidence, trust coherence, and manipulation risk.

- Designed a five-buyer agentic platform translating Meta AI's TRIBE v2 fMRI model into real-time cognitive scores; architected Trust Gradient governance layer, three-phase PRD (66 features, 11 pillars), and working prototype deployed on GCP Cloud Run with NVIDIA L4 GPU.
- Designed the full governance layer: Trust Gradient Engine, Global Kill Switch, immutable audit log — connecting five buyer views (engineer, PM, growth, designer, red team) into a unified platform.

Stack: React 18, TypeScript, Tailwind, Recharts, React Context, Playwright, FastAPI, Docker, GCP Cloud Run, TRIBE v2, HuggingFace, Vercel

Clinical Pediatric Nutrition Assistant (CPNA) · Agentic RAG System 2026

<https://frontend-kappa-umber-23.vercel.app>

- Built a multi-agent RAG assistant providing evidence-based paediatric nutrition therapy grounded in clinical sources and regional Food Composition Tables.
- Hybrid retrieval pipeline (vector + BM25) with condition-tag routing and semantic chunking.
- Multi-agent orchestration: intent classifier, therapy gatekeeper with slot validation, deterministic nutrient engine for diet optimisation.
- Deployed FastAPI + Next.js on Vercel with persistent Qdrant Cloud vector index.

Stack: Python, LangChain, FAISS, HuggingFace, DistilBERT, Groq API, LLaMA, Vercel, Qdrant

CPNA Evaluation Suite · Standalone AI Eval Platform for the Agentic RAG System 2026

<https://cpna-eval-one.vercel.app>

A precision instrument for testing, scoring, and monitoring every layer of the CPNA system from intent classification and therapy gating to retrieval quality and context safety.

Fashville · AI-Powered Social Commerce Platform for African Fashion 2026

AI prototyping capstone: two-sided fashion marketplace for African creators entering global markets.

- Designed the full product vision for a social commerce platform combining live commerce, creator discovery, and AI-powered search relevance built for African fashion brands scaling globally.
- Built two full high-fidelity interactive prototypes using AI-assisted design: consumer platform and a dedicated operator admin dashboard serving as a single source of truth for product and growth analytics.
- Authored admin PRDs defining data architecture, operator workflows, analytics instrumentation, and creator management tooling.
- Produced a technical case study on how LLMs and AI infrastructure can transform search relevance, live commerce, and creator discovery on a two-sided fashion marketplace.

Hotel Booking Cancellation Prediction · MLOps 2025

- Built an end-to-end ML system predicting hotel booking cancellations, modelling ~\$150K–\$300K annual revenue savings per 1,000 rooms.
- Developed a full MLOps pipeline with experiment tracking, CI/CD, and cloud deployment; authored business case study defining project flow and outcome.

Stack: Python, scikit-learn, LightGBM, MLflow, Docker, Jenkins, Flask, GCP Cloud Run

EDUCATION

MBA, Marketing · NEXT MBA — Next University, Valencia, Spain · April 2025

BSc. Nutrition & Dietetics · University of Nigeria, Nsukka · March 2013

CERTIFICATIONS

- **Oracle** — Cloud Infrastructure Generative AI Professional
- **Duke University** — Large Language Model Operations (LLMOps)
- **Duke University** — MLOps | Machine Learning Operations
- **Stanford University** — Machine Learning Specialization
- **IBM** — AI Product Manager Professional
- **McKinsey** — Digital Transformation Leadership Program
- **Coursera Network** — LLM Benchmarking and Evaluation

TECHNICAL SKILLS

AI/ML: Machine learning, deep learning (Keras, scikit-learn, TensorFlow, PyTorch), Generative AI, LLMs, AI Agents, RAG systems, FHE (fhEVM)

MLOps / LLMOps: MLflow, LangChain, LangGraph, FastAPI, Docker, Jenkins, AWS ECS, GCP Cloud Run

AI-Assisted Product Design: High-fidelity interactive prototyping, zero-handoff design-to-engineering workflow, two-sided marketplace UX architecture, admin dashboard design

Data Analysis: Python (Pandas, NumPy, Seaborn, Matplotlib), SQL, Tableau, Google Analytics, MixPanel

Product Tools: Jira, Notion, Figma, Balsamiq

Remote Collaboration: Async-first workflows, multi-timezone team coordination, Notion, Slack, Linear
